

XCEED®

Siding by **VERSATEX**

XCEEDING Your EXPECTATIONS

XCEED by VERSATEX is durable PVC siding that adds beauty and elegance to any home or building's exterior. Its unique wood-like appearance in 10 contemporary colors provides a high-end look coupled with the durability and maintenance-free features you come to know with VERSATEX PVC. Unlike traditional siding options, XCEED has been carefully developed and tested and is backed by a limited lifetime warranty, providing you peace of mind that your building is protected from an ever-changing environment.

XCEED is available in two distinct lap siding profiles, 4-1/2" and 7-1/2" reveal, each in 16 ft board lengths, enabling fewer butt joints and a quicker installation. Its unique VZ drop lock helps to ensure each row remains level as each row stacks and interlocks move up the wall.

Why VERSATEX?

VERSATEX Building Products is the only company in its industry focused on the cellular PVC building products market for 20 years. With expertise in the design, development, production, and sale of PVC building products, VERSATEX's strength lies in innovation and the ability to bring new product solutions and systems to market to help our builders, contractors, architects, and homeowners. Dedication, education, and innovation equate to VERSATEX being a proven industry leader with an unmatched service platform and best-in-class product quality.

4 1/2" in Simple Sage

The 4 1/2" lap siding is a narrower profile that delivers a clean, classic look that suits various architectural styles, making it a timeless choice for any exterior project.

7 1/2" in Heritage Blue

The 7 1/2" lap siding offers a wider reveal, creating a bold, modern aesthetic that combines style and size, making it an ideal selection for your next project.

	XCEED Siding by VERSATEX	CEDAR	FIBER CEMENT	VINYL
HIGHEST R-VALUE	X			
IMPERVIOUS TO MOISTURE	X			X
CLASS A FIRE RATING	X		X	
NO PAINT/STAIN REQUIRED	X			X
IMPACT/WIND RESISTANT	X	X	X	

Some Features Include:

- Premium lengths = fewer butt joints and a faster, more efficient install.
- Water resistant and not susceptible to swell, bow, warp, or rot.
- Thicker and more durable than vinyl siding, with a high-end wood-like appearance.
- Color that lasts – maintenance free with no need for routine painting like natural or engineered wood and fiber cement.
- Once the first row is level, VZ Drop-Lock allows for faster installation, interlocking each row, ensuring a level appearance as you install up the wall.
